

CATTLE + CALF NUTRITION

Fresh Calver

A palatable supplement for the freshly calved cow to provide energy, calcium and electrolytes.

- The calving period is a critical phase in the lactation cycle
- A successful start for cows and calves is essential
- Calving cows are at risk of dystocia, hypocalcaemia, displaced abomasum and retained foetal membranes
- Fresh Calver provides;
 - ✓ Immediately available energy
 - ✓ Electrolytes to aid rehydration post calving
 - ✓ Available calcium to help support increased demand
 - ✓ Vitamin E and selenium help support cleansing

Roto-Corona Plus

A complementary feed that helps support the newborn calf's natural defences against the challenges of life.

- Roto-Corona Plus provides newborn and transported calves with highly concentrated digestible energy, bovine and egg proteins to help get them off to a great start. Ideal for administering at times of stress such as transport
- Administering one Roto-Corona Plus syringe soon after birth can help support natural defences to the challenges of life

Calf Kick Start

Calf Kick Start is a source of energy and nutrients for unthrifty, sick and scouring calves.

- Calves are born with low blood sugar levels
- Calves that don't stand and suckle (dam or bottle) soon after birth are at risk
- Easy to administer Calf-Kick Start helps get calves up and suckling vigorously, quickly
- Calf Kick-Start is ideal for weak newborns struggling to stand and is ideal for use in calves through to 3 months old

Nutri-Scour 5 in 1

For the stabilisation of water and electrolyte balance during diarrhoea. Nutri-Scour 5 in 1 contains;

- Electrolytes - sodium, potassium and chloride to help restore electrolyte balance
- Energy - facilitates sodium and therefore water absorption from the gut through the inclusion of dextrose (glucose)
- Alkalising agent - helps reverse acidosis through the provision of an alkalising agent (sodium bicarbonate)
- Psyllium - gelling agent to coat the inflamed intestine wall and help slow the passage of fluid through the intestine, helping to resolve diarrhoea quickly
- Pre and Probiotics - helps support healthy re-colonisation of the gut with the aid of pre and probiotics.

COLOSTRUMS

Whole Colostrum for Calves

Premium, high energy colostrum for calves, formulated with bovine colostrum and egg protein to provide energy and protein when insufficient maternal colostrum is available.

- Calves are born with no circulating antibodies leaving them vulnerable to infection and disease
- Calves rely on the intake of high quality colostrum from the dam to provide them with the protection they need
- Heifers can produce low quality colostrum as can cows who come into a lot of milk (antibodies are effectively diluted)
- Whole Colostrum for Calves provides a range of nutrients essential for survival and is sourced from IBR, EBL and Johne's disease-free herds

CALF FEEDING

Calf Feeder Bottle & Teat (non-vac system)

- 1.5 litre ridged polycarbonate bottle suitable for microwave sterilising
- Quality non-vac rubber teat designed for calves and other large livestock
- Neck size also accommodates lamb non-vac teat

Calf Feeder Bag

- Robust 2.5 litre bag with a stomach feeder tube in a clear, sterilised, Euro slot holder bag

UDDER CARE

Udder Wipes

Formulated to disinfect, soothe and help support the condition of sore and cracked udders and teats.

- Use for the hygiene of the teats and udder before attaching milking plant, as an aid in the control of mastitis and general udder care
- Use one udder wipe per cow, having first removed any heavy contamination from the teats

Teatmint

A soft, readily absorbed, cool and soothing cream containing 35% Peppermint Oil.

- Teatmint contains a range of natural plant extracts known for their soothing properties and supportive effects on circulation and wound healing
- Mastitis is a painful inflammation of the mammary gland
- Applying a cooling, soothing preparation such as Teatmint to the area will help ease the discomfort the cow feels
- No requirement for milk withdrawal

Udder Salve

A high quality, traditional udder salve based on pharmaceutical grade petroleum jelly with added emolliency to support skin condition.

- Massaging the udder with a traditional salve helps soothe and support udder condition
- Salves are especially useful when weather conditions lead to dry, sore or chapped teats
- No requirement for milk withdrawal

Udder Cream

A soft, readily absorbed, non greasy, aqueous barrier cream that supports superior skin suppleness and protection.

- Using an udder cream will provide a barrier to adverse weather conditions and help protect and soothe skin
- Udder creams are especially useful when weather conditions lead to dry, sore or chapped teats

CATTLE VITAMIN & MINERAL DRENCHES

Cattle Drench

Cattle Drench is a high specification vitamin and mineral drench for calves, yearlings, cows and bulls.

- Forage provides a large proportion of the diet of many cattle and is often lacking in essential minerals and trace elements
- Imbalances and deficiencies of minerals and trace elements can have adverse effects on live weight gains and fertility
- Nettex Cattle Drench can help balance forage shortfalls and ensure adequate status
- Drench calves/yearlings to help support liveweight gains.
- Administer to cows to help counteract calving stress and weight loss
- Administer to bulls to help support energy, condition and fertility

GENERAL ANIMAL HEALTH

Agri-Gel

- Long lasting lubricating gel which will not dry or flake
- Ideal for obstetric use and pregnancy diagnosis
- Suitable for artificial insemination as a lubricant, or to be used as a scanning gel
- Non spermicidal

Veterinary Surgical Scrub

- Fast acting, broad spectrum, antibacterial skin cleansing liquid scrub
- Kind to the skin, and suitable for use all over the body
- Surgical scrub can be used for any application where hygiene is of paramount importance; including veterinary pre and post-operative procedures

ANTIBACTERIAL

Septiclense Spray

An easy-to-use aerosol cleanser with a powerful antibacterial action. Ideal for application to minor external wounds, grazes or skin punctures in all livestock, including horses.

- Contains antibacterial, natural soothing and drying agents
- Clear formulation does not discolour skin or hair
- Violet formulation allows easy identification of sight of application

Bactocycle

A ready-to-use, trigger-spray disinfectant with strong antibacterial and antiseptic action.

- Even minor wounds can become severely infected. Use Bactocycle for quick and effective cleansing
- Iodine formulation allows easy identification of sight of application and makes Bactocycle suitable for use on navels
- The formulation is kind to skin and suitable for use on all livestock including horses

Umbilical Spray

- Instant cleansing, broad-spectrum disinfectant for use on umbilical cords in newly born livestock
- Contains antibacterial agents, is rapid drying, and is easily identifiable once sprayed

Orph Paste

An easy to apply antibacterial topical cream for application to skin lesions.

- Sheep and goats particularly lambs can suffer from a disease characterised by scabby lesions around the mouth and nostrils
- This is commonly seen in young lambs and their ewes and in older lambs in late summer
- This is not usually a severe disease, but the lesions can become secondarily infected

FOOT CARE

Footmaster

A concentrated disinfectant spray for use in the maintenance of healthy feet.

- Foot conditions in livestock are not only a health and welfare issue but also have a significant impact on growth and production
- Prompt and effective application at the first signs with Footmaster will help support foot health.

Lameless Ready to Use (formerly Derma Phenox)

An on-the-spot, powerful trigger spray application providing a triple level solution to foot health in sheep and cattle.

- Foot rot in sheep and digital dermatitis in cattle are two of the most prevalent and costly foot health conditions on farm
- Application at first sight with the powerful formulation contained in Lameless ready to use, can help provide effective support of foot health
- Lameless ready to use incorporates a combination of antibacterial and disinfectant actives to help support maintenance of foot health

INSECTICIDES AND FLY REPELLENTS

Professional Fly Killer

- Ready-to-use contact killer with residual activity
- Targets species such as, flies, mosquitoes, wasps, ants, fleas and ticks
- For use in and around buildings and yards including dairies, milking parlours, and animal housing
- Contains: Permethrin and Tetramethrin

Fly and Wasp Killer Aerosol Spray

- Combines the rapid knockdown of tetramethrin and effective kill of permethrin

Summer Fly Cream

- D.E.E.T. based, non-greasy, readily absorbed to help control biting midges and flying insects
- Contains pure lanolin and glycerine as emollients

TOOLS

Abscess Foot Rot Knife

- High quality, stainless steel foot-rot knife with a curved retractable blade
- Suitable for paring and removing abscesses in infected hooves

Foot Paring Knife

- High quality knife with shaped surgical steel blades ideal for foot paring
- Curved and straight blades

Myti-Lyte Mark 2 (lamb foot rot shear)

- High quality knife with shaped surgical steel blades ideal for foot paring
- Curved and straight blades

Myti-Lyte Mark 3

- New ultra sharp mini-serrated blades in straight or offset designs

Nettex Collate Absorption Technology

Nettex cattle and sheep nutrition products benefit from a patented manufacturing process: **COLLATE ABSORPTION TECHNOLOGY**

- Essential nutrients are bonded to the rapidly absorbed energy base
- The energy source in products becomes an effective carrier of vitamins, amino acids and minerals
- Nutrient uptake is accelerated
- Trials have shown that 50% of nutrients are absorbed into the blood within 30 minutes of feeding to the animal

SHEEP NUTRITION

Multi Lamb Rapid

Gets ewes up and feeding within hours!

Multi Lamb Rapid is a fast working, high energy nutritional complex for ewes carrying multiple lambs.

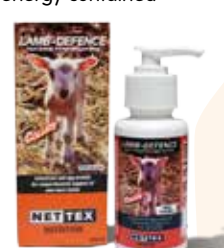

- Ewes suffering from twin lamb disease, and the lambs they are carrying, are at high risk of death.
- A 45ml of Multi Lamb Rapid feed will help re-balance a ewes energy and nutritional needs FAST
- Exhausted ewes can be fully recovered within a few hours

Lamb-Defence

Colostrum and egg protein for comprehensive support of new-born lambs.

- Lamb-Defence is formulated with colostrum, egg protein and trace elements to support lambs in the critical first few days of life
- New born lambs are extremely susceptible to bacterial infections caused by unfavourable bacteria.
- Colostrum is essential for immune development
- The addition of protein and energy contained in Lamb-Defence will help support vigorous suckling from birth.

Lamb Kick-Start

A rapid energy boost for small, weak and growing lambs.

- Lamb Kick-Start is a fast acting energy source for the elevation of blood glucose levels in weak lambs
- The addition of key ingredients in this supplement ensures it is especially formulated to support lambs in the critical first few days of life
- Lambs are born with just enough energy to stand and suckle, but this energy runs out quickly
- Lambs that don't get up and suckle are at risk from hypothermia and death
- Easy to administer Lamb Kick-Start supports fading lambs to feed fast

COLOSTRUMS

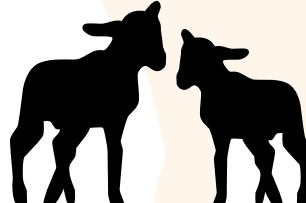

BEST PRACTICE Colostrum Management Lambs

Lambs (and calves) are born with no circulating antibodies

- This leaves them vulnerable to disease and infection
- Colostrum is the lamb's only source of antibody provided the ewe
- Lambs receiving inadequate colostrum are at increased risk from disease challenges

There are three golden rules to colostrum feeding:

- Quality
- Quantity
- Quickly

Ultra Concentrate

High quality easy mix first day colostrum.

- Ultra concentrate mimics the ewes own colostrum
- Feed when insufficient maternal colostrum is available
- Formulated with bovine colostrum and egg proteins
- Fortified with ewes milk for added support
- Contains immune supporting vitamins A,D and E

SHEEP VITAMIN & MINERAL SUPPLEMENTS

Sheep Conditioning Drench

Packed with nutrition, Sheep Conditioning Drench is a high quality, high specification vitamin and mineral drench.

- Formulated for use in ewes, rams and lambs
- Ideal for use at critical points in the year to help ensure animals are in the best condition possible
- Contains essential trace elements, vitamins and amino acids
- Ewes and Rams, administer: 15ml pre tupping and again at lambing for ewes
- Lambs, administer: 1-2 months 5ml, 3 months + 10ml

Cobalt, Selenium & Vitamin B12 Drench

Unlock performance potential with this specific trace element and vitamin supplement for cattle and sheep.

- Large areas of the UK are cobalt and selenium deficient, practices such as liming and pasture improvement worsen this situation
- Cobalt is essential for growth and development of young stock and has important implications in ruminant fertility
- Animals deficient in cobalt and selenium will substantially under perform
- Cobalt, Selenium and Vitamin B12 Drench also contains additional vitamins A, D,E and B1 for added performance potential
- Cobalt, Selenium and Vitamin B12 Drench should only be fed to animals requiring an additional source of these elements

COB-I-SEL

A slow release 25-day cobalt supplement for finishing lambs that also delivers iodine, selenium and multi-vitamins.

- Specifically to help maintain optimum cobalt levels in rapidly growing lambs finishing at grass and produce quality carcasses at finish
- Its formulation also makes it ideal for targeted use during the ewe's production cycle e.g. pre-tupping or pre-lambing
- Cobalt is required for rumen synthesis of vitamin B12 and vitamin B12 is required for energy production
- There is very little storage capacity in the body for cobalt and vitamin B12, so the animal relies on a daily intake from feed, forage or grazing
- If forage or grazing is lacking in cobalt, animals become cobalt deficient very quickly, and may suffer from the resulting condition known as pine
- Pine will cause poor growth and wool quality in lambs resulting in small lambs with poor body condition.

LAMB FEEDING EQUIPMENT

Colostrum Feeder Bottle & Orange Latex Tube

Combination pack includes orange surgical latex stomach tube and graduated bottle, 250ml capacity

Colostrum Feeder Syringe & Latex Tube

Combination pack includes orange surgical latex stomach tube and graduated syringe, 60ml capacity

ColostrumFeeder Syringe & Plastic Tube

Combination pack includes clear plastic stomach tube and graduated syringe, 60ml capacity. Spare plastic and latex tubes are available

Non-Vac Bottle

- Large, 500ml, polycarbonate bottle complete with teat, collar and extra wide neck for easy filling
- Extra tough to prolong life and calibrated for accurate feeding
- Sterilise by boiling

Non-Vac Teats

- Specially designed isoprene teat with unique moulded in vacuum release valve

Pull-On Lamb Teat

- Superior rubber for supple, strong walls
- Fits most household bottles

Non-Vac Bottle Rack system

- Innovative multi-lamb feeder for effective rearing of orphan lambs
- Feed one to four lambs simultaneously and unattended

LAMBING REQUISITES

Lamb Puller

- Hygienic soft rubber kinder to lambs during birth

Lamb Adoption Musk

- Helps to eliminate rejection during fostering by neutralising the natural ewe and lamb odours

Castration Rings

- Rubber rings for the castration and tail docking of lambs

Elastrator Pliers

- Extremely high quality steel pliers for applying rings when castrating or tail docking

Easy Adjust Prolapse Harness

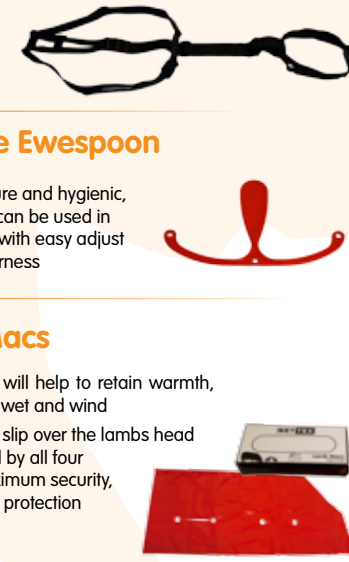

- Well-designed harness for the secure retention of prolapses without the need for stitching

Prolapse Ewespoon

- Simple, secure and hygienic, ewe spoon can be used in conjunction with easy adjust prolapse harness

Lamb Macs

- Lamb Macs will help to retain warmth, keeping out wet and wind
- Designed to slip over the lambs head and secured by all four legs for maximum security, comfort and protection

SHEARS & CROOKS

Perfectly designed dagging and crutching shears, made of quality steel to retain a fine cutting edge.

- Dagging
- Dagging Straight
- Dagging Bent
- Single Bow
- Double Bow

High quality and robustly designed Shepherd's Crooks.

- Long Neck
- Short Neck
- Long Leg
- Short Leg
- Double end combination neck and leg

BREEDING IDENTIFICATION

Ram Harnesses

Sure Sired Ram Harnesses are British manufactured at Nettex. Each harness is designed to deliver strength and comfort.

- Pedigree cotton harness (extra padded chest strap)
- Cotton anti-chaff
- Leather anti-chaff
- Nylon anti-chaff

Marker Crayons

Rated by the British Wool Marketing Board as the best group of marker crayons in extensive weather tests, Sure Sired Marker Crayons are bright, durable and fully scorable.

- Available in six colours: Red, blue, green, orange, yellow and black
- Available in two different climatic compounds: all weather and cold use.

Flock Master Marking Paste

A high quality, consistent, fully scorable marking paste.

- Applied to wet or dry fleeces, colours will remain strong and easily distinguishable for unmistakable identification
- Available in 5 highly visible colours: red, blue, green, orange and black
- 2.5L and 5L packs available

Promark Branding Fluid

A premium sheep branding fluid for professional long lasting identification of sheep & lambs.

- Long lasting, highly visible and durable, lasts up to 12 months whilst still being fully scorable
- Available in 4 highly visible colours: red, blue, green and orange
- 2.5L and 5L packs available
- Apply with a branding iron for most economical application

MARKER SPRAYS

Promark

A step forward in the identification market, Promark is a premium, long lasting, fully scorable, professional marker spray for sheep farmers.

- Available in seven vibrant colours: Red, blue, green, orange, yellow, purple and black
- Rapid drying and waterproof formulation
- Works on both wet and dry fleeces
- Guaranteed not to clog when spraying

Marksman

Approved by the British Wool Marketing Board, Marksman marker spray has provided farmers with reliable sheep marking for more than 20 years.

- Available in seven vibrant colours: Red, blue, green, orange, yellow, purple and black
- Weather resistant and fully scorable
- Quick drying formulation
- Works on both wet and dry fleeces
